Highlights

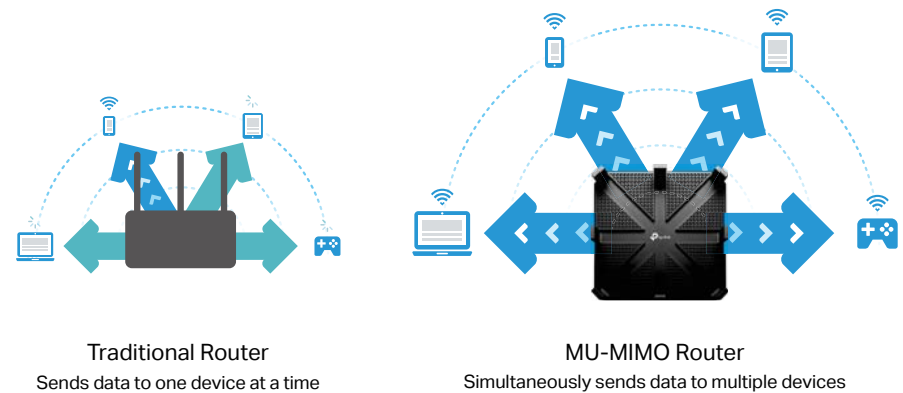

XStream Architecture for Powerful Processing

With XStream architecture, the Archer C5400 adds a dedicated processor for each band to manage Wi-Fi traffic, freeing up the router's 1.4GHz dual-core CPU to tackle more demanding tasks.

MU-MIMO for 4x Faster Connections

MU-MIMO technology serves up to four devices at once, reducing wait time, increasing Wi-Fi throughput for every device, and making each stream more efficient.

Highlights

Smart Connect for Better Connections

Smart Connect technology surveys the Wi-Fi environment to intelligently assign devices to the best available band, balancing the network load to give each device optimum connection and throughput.
